

meeting 28/2/23

people present:

jack, claire, michael, yudai, liren

progress:

1. made rough plan for iteration 1 -
2. assign members tests to write 2-3 each
3. watch iteration 1 video and read spec carefully before Thursday week 3
4. assign member functions to write Thursday week 3
5. finish tests before Sunday w3
6. exchange ideas and issues in stand up on Sunday 5/3
7. finish implementation by Thursday week 5 - so we have time to finalise everything and submit on Friday
8. note down any assumption in the process of writing tests and implementation and gather ideas in tut-lab on Thursday 9/3

goals to keep in mind - leader board release - ideally try to push in some functions to be marked problems that occurred - members were unsure of how to approach test writing - decided to push back test deadline so we can get some practice on writing tests by completing lab 3 first

delegated tasks for each member:

tests:

claire	authLoginV1, channelsCreateV1
michael	authRegisterV1, channelsListV1
jack	channelDetailsV1, channelInviteV1
yudai	channelMessagesV1, clearV1
liren	userProfileV1, channelJoinV1, channelsListAllV1

implementation:

claire	channelDetailsV1, channelInviteV1
michael	authLoginV1, channelJoinV1
jack	channelsListV1, channelsListAllV1, userProfileV1
yudai	authRegisterV1, channelsCreateV1
liren	channelMessagesV1, clearV1e
