

## **Minutes of Meeting 14 of March**

Attendees: Michael, Yudai, Liren, Jack

### Points Discussed:

- iteration 1 marks
- went over auto tests failures for iteration 1 - worked out which functions needed fixing and what went wrong in our code
- briefly read over iteration 2 spec - merged in new starter code.

### To do:

- every member need to go through iteration 2 thoroughly
- fix up implementation for iteration 1 functions - each member fix problems with the functions that they implemented
- update files to typescript
- implement types in code
- add in implementation of the token in replacement of authUserId
- implement server requests for iteration 1 code
- implement server request tests for iteration 1 tests

above should be done by Thursday 9th of March - where iteration 2 functions will be allocated
