

Minutes of Meeting – 28/3/23

People Present: Claire, Jack, Michael, Liren, Yudai

Discussed:

- reminded that the one helper function is not coded properly, and it can cause some error
- reminded that implementation of some functions from iteration 2 is ready to be tested, so some testing functions which are not yet done need to be merged into master soon
- figured out the remaining error occurred by the functions from iteration 1, and decided to be asked in help session
- discussed npm error that one of the group members has
- reminded that all returning type of functions are object
- discussed error occurred when the branch is being pushed (few members faced this problem and resolved through the discussion)
- decided the aim for completing each feature: testing functions are due on 28th and implementation functions are due on 30th
- decided to test and modify all the functions on 30th and 31st of March

To do:

- modify codes that were mentioned in the meeting such as a helper function
- complete test functions by 28th (after meeting)
- complete implementation functions by 30th
- test and modify all functions on 30th and 31st
